

Tips and Tricks To Improve Backdrops

Adding to the realism of your model railroad with backdrops.

Author and Photographs

Learning Objectives

- 💧 Review AP Scenery requirements for “Background”
- 💧 Explore “Tips and Tricks” for improving realism
- 💧 Disguise 90° angles where the backdrop meets the benchwork
- 💧 View and analyze examples of model railroads and their backdrops

NMRA AP Scenery

- ◆ Background is 1/5 of “score” and should:
 - ◆ Realistically depict depth, distance, horizon, and sky.
 - ◆ Match scenery.
 - ◆ Smoothly transition to 3D portion.

Mindheim: Realism Tips

Article in March 2017 *Model Railroader* Magazine

- ◆ Effective backdrops one of “four cornerstones of realism”
- ◆ “The simpler and more toned down, the better”
- ◆ KISS: simple blue surface and low horizon
- ◆ Structure skyline: short and at 90° viewing angle
- ◆ Pitfall when waterway or road in layout meets backdrop

Not Just Realism, but . . .

- ◆ Help to establish your railroad's:
 - ◆ Season
 - ◆ Geographic Location
 - ◆ Era?
- ◆ Help to establish tone, atmosphere, mood

Tricks and Tips: Overview

Creating Depth and Expanding the Modeled World

**Tabletop Height or Seams
Break the Illusion.**

**Higher Layout and
Relatively Low Horizon**

Realistically Depict Sky Cove Corners & Hide Seams

Cove Corners and Hide Seams

Cove Corners and Hide Seams

- ◆ Typical wallboard techniques
- ◆ Fiberglass tape
- ◆ Three coats of joint compound

Realistically Depict Sky

Fade Towards Horizon

Realistically Depict Sky

Fade Towards Horizon

- 💧 Prime or paint with spray or roller
- 💧 Just a simple blue or gray color
- 💧 Fade blue into white at horizon

Realistically Depict Sky

What About Clouds?

- 💧 KISS principle—
Maybe just faded blue
or gray?
- 💧 Stencil and spray
- 💧 Use of airbrush
- 💧 Painted clouds
- 💧 Subtle, not solid

Realistically Depict Sky Clouds: Paper Towel Technique

Realistically Depict Sky

Bernie Kempinski's Primer Wash Technique

Painted Versus Photo Backdrop

In either case the backdrop should be the background, not as detailed or intense as the trains.

- ◆ Beyond the sky, painted backdrops work best with natural subjects such as hills, fields, and trees.
- ◆ Simple impressions rather than cartoon or overly detailed.
- ◆ Most “experts” recommend using painted sky, even with photo backdrop.
- ◆ Photo backdrop is best for cities or buildings. Try to avoid conflicting perspectives or scales.

Tony Koester: Kitbashing Photo Backdrops

Article in June 2018 *Model Railroader* Magazine

- 💧 Adobe's Photoshop Elements
- 💧 Clone, skew, and paintbrush tools
- 💧 Cutting and pasting digital and commercial photos
- 💧 Hobby knife, Pan Pastels, 3M Super 77

Tony Koester's *Nickel Plate Road*

Paul Dolkos: Tips for Blending Backgrounds

Article in June 2018 *Model Railroader* Magazine

- 💧 Small photo prints less than 4" tall: low horizon line
- 💧 Located between 3D elements: “visual foils”
- 💧 Structure flats
- 💧 Home printer, matte paper, sky cut off, edges touched up with colored pencils, Dullcoat

Tricks and Tips: Using Color

Creating Depth and Expanding the Modeled World

Tricks and Tips: Using Color

Creating Depth and Expanding the Modeled World

- ◆ Related colors on layout and backdrop
- ◆ Scenery and backdrop **paints**
- ◆ **Scenery materials** and backdrop colors
- ◆ **Scale!**

Using Paints & Color

Problems and Solutions

Shadows and Edges on Backdrops

- ◆ Problem: Shadows on the backdrop/sky
- ◆ Solutions: Lighting, Shadows on objects with 3D layering techniques
- ◆ Problem: Edges meeting backdrop
- ◆ Solutions: Hide edges

Quick Review of Perspective

Two Point Perspective

Problems and Solutions

Issues with Perspective

- ◆ Problem: Conflicting perspectives, vanishing points, and horizon lines
- ◆ Solutions: Avoid numerous vanishing points on different horizon lines

Problems and Solutions

Shadows on Backdrops

Problems and Solutions

Shadows on Backdrops

Tricks and Tips: Problems and Solutions

- ◆ Scenic divides
- ◆ Plan for coved corners
- ◆ Holes in the backdrop are another problem!
- ◆ Tear down RR and move, probably an overstep

Disguising the 90° Angle

Where the backdrop meets the layout

- ◆ On the left, the dreaded 90° angle.
- ◆ On the right, foreground scenery elevated to hide the joint.
- ◆ What is working?

Disguising the 90° Angle

Cove the corners!

- ◆ Wide curve with hardboard at corner
- ◆ Prototype photos
 - ◆ Personal library & field trips
 - ◆ Google Earth
 - ◆ Real estate listings

Disguising the 90° Angle

Berms and Gaps

Disguising the 90° Angle

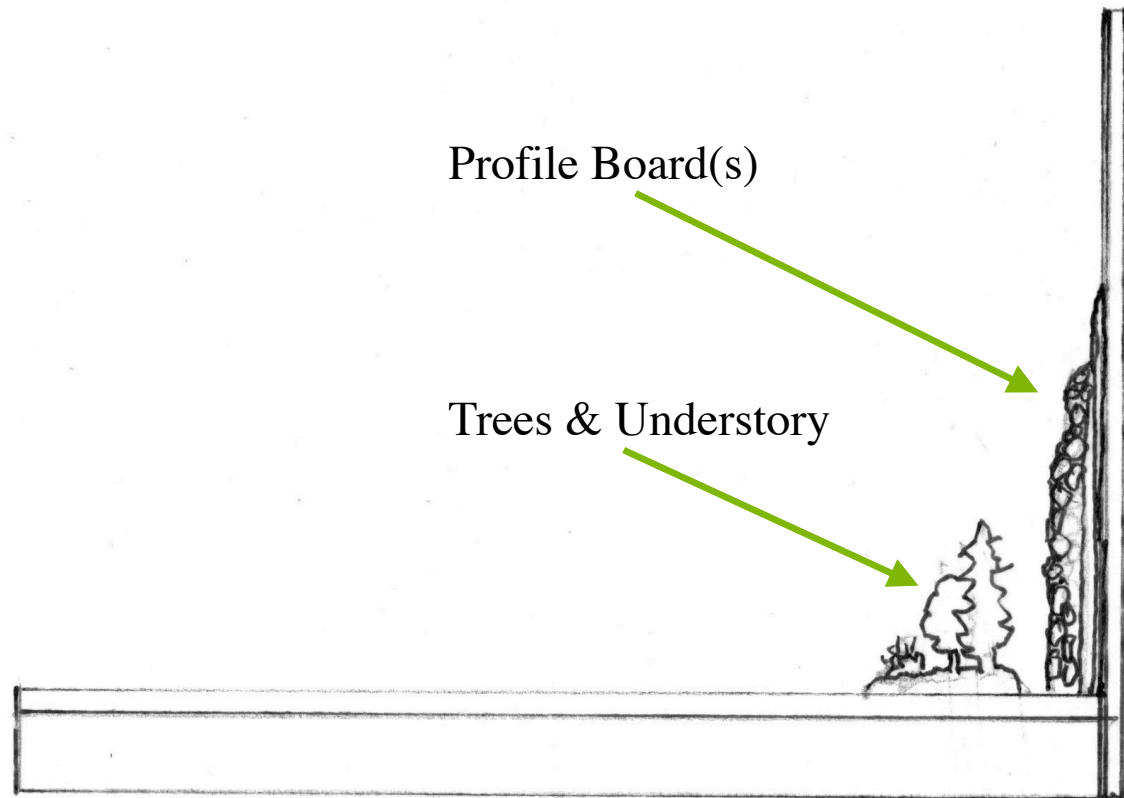

Berms and Gaps

- Slight rise in landform in front of angle
- A slight gap gives the illusion of distance
- Foam, crumbled newspaper, plaster gauze, Sculptamold, etc.
- Additional ground cover

Disguising the 90° Angle

Profile Boards

Jeff Mutter's *Erie Lackawanna Scranton Division*

Disguising the 90° Angle

Where the backdrop meets the layout

- 💧 Rivers turn forming an acute angle
- 💧 Rivers disappear behind trees, buildings, or hills
- 💧 Use of mirror?

Neal Schorr's *Middle Division of the Pennsylvania RR*

Disguising the 90° Angle

Where the backdrop meets the layout

- ◆ Roads at acute angle
- ◆ Roads dip over hillside
- ◆ Roads disappear behind trees, buildings, or hills
- ◆ Size and color of 3D hills and trees compliment backdrop ones.

Marty McGuirk's *Richford Branch of Central Vermont*

Disguising the 90° Angle

Where the backdrop meets the layout

Modeling and photograph by Dick Bradley

- Photo backdrop as solution of road into backdrop.
- Low horizon photo printed on matte paper mounted on backdrop.
- Size and color of 3D scenery and backdrop compliment each other.
- Cars, trees, poles, and people all disguise the joint.

Road “Rabbit Hole” Cove the Road

Natural Features

- ◆ Distant 3D hills and trees:
“profile boards” or scuff pad
tree lines (Mirlon 4”X33’
Ultra Fine, Gray)
- ◆ Berms or hills
- ◆ Trees
- ◆ Shrubbery

Human Features

- ◆ Buildings or Flats
- ◆ Fences
- ◆ Signs or billboards
- ◆ Trucks or other vehicles
